

Fume-A-Vent "Candy Cane" Vertical Stack Adapters

Date 7/12

Part No. CC-XXXX

Accessories

TAB 11-D

The Fume-A-Vent 6" Candy Cane (Vertical Exhaust Stack Adapter) is designed for safe, quick and easy 100% source capture of diesel and/or gas exhaust fumes from Vertical Exhaust Stacks. The "HC" hose connection allows for a quick disconnect so the Candy cane can be directly connected to a standard tailpipe adapter for undercarriage exhaust systems. The Quick-Fit Clamp-together laser welded design offers unlimited flexibility. Fume-A-Vent Candy Canes are available in 4", 5", 6", & 8" diameters in Galvanized or Stainless Steel. Also available without hose connection. This adaptor comes standard with handles for added support.

Note: Please specify if Stainless Steel is required. All "10A" Candy Canes are adjustable models.
