Fume-A-Vent offers Crushproof Tailpipe Adapters with variety of styles to chose from and meet you needs. No system is complete without a tailpipe adapter which will extend the life of the hose itself. The Crushproof adapters are all high temperature neoprene rubber. Only the F400 can have the Plug Option. Spring Clamps are optional on all Adapters.

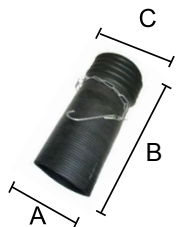

Hook and chain holds the tailpipe adapter in place and protects the hose and tailpipe. If the Plug Option is added, the chain will hold on the Plug to the adapter. Always select an adapter with at least 1/2" diameter clearance around the tailpipe. Some systems will also need an exhaust fan for proper CFM and temperature. These adapters are capable of temperatures to 600° F.
