Date 7/12

Part No. H-09-XXXX-N

Type 9 850°F Hose

TAB 1- I

This Fume-A-Vent Type 9 is another high temperature hose that is made with special coated high-temperature fabric. This hose should be used on applications such as load bearing vehicle exhaust, suction plants, furnace construction, metal works, and other higher temperature demands.

Temperature Range: - 75°F to +850°F (Baking Test)

This product has a temperature rating at 930°F for intermittent use, 850°F constant use.

This grey high temperature hose is made with special coated fabric with an external galvanized steel helix. It has a high flexibility and tensile strength. This hose also has flame resistance and 1:6 compressibility.

Common lengths include 15' to 30' with 4" to 8" Diameters and can also be used in Dual Temperature hoses. Other information such as bending radius and helix pitch are available upon request. This product should always be used with the proper Tailpipe Adapter and Fan for your application. The chart below shows common hose sizes and weight.
