

Fume-A-Vent Type 10 1000°F Double Layer Impregnated Glass Fabric Hose

Date 7/12

Part No. H-10-XXXX-N

Type 10 1000°F Hose

TAB 1-J

This Fume-A-Vent Type 10 hose is a higher temperature hose that is made with a double layer glass fabric wall. It can be effectively used on military applications, suction plants, metal works, radiant heat protection, and primary extraction hoses. This hose is silicone free and highly flexible.

Temperature Range: - 5°F to +1000°F (Baking Test)

This product meets Flame retardant UL-94 VO and federal motor vehicle MVSS-302 test standards.

This product has a temperature rating at 1300°F for intermittent use, 1000°F constant use.

This silver high temperature hose is constructed with an outer impregnated glass fabric wall and an inner wall of special coated fabric, reinforced by stainless steel wire. It also has a galvanized steel external helix.

Common lengths include 15' to 30' with 4" to 8" Diameters and can also be used in Dual Temperature hoses. Other information such as bending radius and helix pitch are available upon request. This product should always be used with the proper Tailpipe Adapter and Fan for your application. The chart below shows common hose sizes and

Part No	Description	Wt. Lbs.
H-10-0415-N	Fume-A-Vent 4" x 15' Type 10 1000°F Impregnated Glass Fabric Hose	21.15
